AI FOR GOOD · SDG 4 QUALITY EDUCATION

# Scrolly

Dense English study material, turned into short interactive cards you can scroll, translate and check yourself on.

**Pavitra & Minhyeok Sung**

studyscrolly.lovable.app

THE PROBLEM

# Dense academic English takes longer to study

**~20%**

more time needed to study a text in a second language than in the first, in one eye-tracking study

**Problem statement**

Students in English-taught programmes who are less comfortable with academic English find it hard and time-consuming to process dense material, spot the key ideas and check their own understanding.

Source: Dirix et al. (2020), Reading Research Quarterly 55(3). One experimental study, not a universal rate.

THE CONTEXT

# Why it matters at THUAS

**3,253**
students from abroad at THUAS in 2023, 12.8% of all students

**11**
bachelor's programmes taught in English at THUAS

**129,764**
international degree students in Dutch higher education, 2025–26

**9%**
of students at Dutch universities of applied sciences are international

*These figures show the context. They count international students, not non-native English speakers or students who struggle with reading.*

Sources: THUAS Annual Report 2023 (2024); Nuffic, International Students in the Netherlands 2026

TARGET USERS

# Who Scrolly is for

**Built for students in English-taught programmes who use English as an additional language, and who are:**

- first-year or early in their studies
- studying from textbooks, notes and articles
- meeting unfamiliar specialist vocabulary
- studying on their own between classes

**Not designed as:**

- a replacement for lecturers or textbooks
- high-stakes legal or medical advice
- specialist assistive technology
- an offline learning platform

WHAT WE BUILT

# How Scrolly works

1

## Add material

Paste text or upload a textbook PDF

2

## Pick a language

One of five supported languages

3

## Choose a focus

A balanced mix or specific card types

4

## Create the deck

AI turns the text into learning cards

5

## Study the cards

One main idea per card

6

## Quick checks

Answer and get instant feedback

7

## Summary

A recap to close the deck

TRY IT LIVE

studyscrolly.lovable.app

THE ROLE OF AI

# Why existing tools aren’t enough

AI turns any study material into a tailored deck: concepts, definitions, examples, “why it matters” cards, quick-check questions and a summary, in the chosen language.

| | Breaks into steps | Checks understanding | Fits your material |
|---|---|---|---|
| Translation tool | No | No | Yes |
| Plain summary | Shortens only | No | Yes |
| Pre-written flashcards | Yes | Yes | No |
| Scrolly | Yes | Yes | Yes |

WORKING PROTOTYPE

# Live demo

## demo video:
## https://drive.google.com/file/d/1gqMAYWy688loSSLkNhxw-ti5T69StVhp/view

Add material → choose language and focus → create the deck → study the cards →
answer quick checks → read the summary

SDG 4 · QUALITY EDUCATION

# Where Scrolly fits in SDG 4

## Target 4.3

**Equal access to quality tertiary education, including university**

Helps students keep up with dense required reading in English-taught programmes.

## Target 4.5

**Eliminate disparities and ensure equal access to education**

Reduces the extra effort that comes from studying in an additional language.

We don’t claim Target 4.1: it covers primary and secondary education, and Scrolly is designed for higher education.

ETHICAL REFLECTION · 1 OF 2

# Risks to accuracy

### Wrong or incomplete content

A card can drop an exception or change a meaning. In law, a small detail can change the rule.

**Next step:** show the source passage behind each card.

### Wrong quiz feedback

Instant feedback feels authoritative, even when it's wrong, and an unsure student is unlikely to question it.

**Next step:** link each question to its source and let students flag errors.

### Translation errors

Specialist terms can be mistranslated, and students may not learn the English term used in class and exams.

**Next step:** keep key terms in English beside the translation.

ETHICAL REFLECTION · 2 OF 2

# Risks to how students use it

### False confidence

Scrolling fast and guessing answers can feel like learning.

**Next step:** add application questions and “explain it yourself” prompts.

### Skipping the textbook

Cards may replace the original instead of supporting it.

**Next step:** link cards to source sections, for use before or after reading.

### Privacy and copyright

Uploaded personal or copyrighted text is processed by an AI service.

**Next step:** add a privacy notice and verify data retention.

### Unequal access

Needs a device, internet and one of five languages.

**Next step:** test with screen readers and low-end devices; add languages.

ETHICAL PRIORITIES

# Our main trade-off

## Simplify enough to help, without hiding the original or losing its nuance.

The biggest remaining risk: a wrong answer that looks convincing to a student who chose Scrolly because the text was hard.

**Our priorities**

1. Make outputs verifiable
2. Keep students in control
3. Test with intended users
4. Verify data handling
5. Improve inclusive access
