

DAILY

WELL BEING JOURNAL

Presented By:
Murad
Pavitra

the problem

- People experience daily changes in mood, stress, sleep, and emotions.
- It can be difficult to recognize patterns over time.
- Traditional journaling mainly stores thoughts without analyzing them.
- Generic wellbeing advice may not consider a person's previous experiences.
- There is a need for a simple system that combines **regular self-reflection + historical context + personalized AI feedback.**

our solution

Daily Wellbeing Journal

An AI-powered journaling system that transforms simple daily check-ins into personalized wellbeing insights.

WORKFLOW

Response

Daily Wellbeing Check-in

Take one minute to reflect on your day.

Email *

Name *

How is your mood today? (1 = very low, 10 = very good) *

How stressed do you feel today? (1 = calm, 10 = extremely stressed) *

What happened today? What is on your mind? *

Submit

Your daily reflection

to me ▼

Hi Pavi,

You sound scared and overwhelmed about the assignment right now, and that worry is reflected in your high stress score. It's understandable to feel tense — taking one small step can make the situation feel more manageable.

Several recent entries show repeated high stress (9–10/10) and worry about assignments or having a bad day.

Today's tip: Try a single 15-minute focused task: set a timer, open the assignment, and either write one sentence or list three bullet points to get started; then stop and breathe when the timer ends.

See you tomorrow.

SDG 3: Good Health & Well-Being

HOW OUR PROJECT SUPPORTS SDG 3?

Sustainable Development Goal 3 (SDG 3) focuses on ensuring healthy lives and promoting well-being for people of all ages.

-  **Promotes mental well-being:** Encourages users to regularly reflect on their mood, stress, sleep, and thoughts.
-  **Identifies wellbeing patterns:** Uses previous journal entries to highlight recurring changes in stress, mood, and other wellbeing indicators.
-  **Personalized reflection:** AI generates reflections based on the user's own experiences rather than giving completely generic responses.
-  **Encourages regular self-awareness:** Daily check-ins help users become more aware of changes in their wellbeing over time.

technologies used

Technology	Purpose
n8n	Automates and connects the entire workflow
n8n Forms	Collects daily wellbeing check-ins
Google Sheets 	Stores and retrieves previous journal entries
OpenAI Chat Model 	Analyzes the user's current and past entries and generates reflections
JavaScript / Code Nodes	Formats data and processes the AI output
IF Node	Checks the predefined stress condition and selects the response path
Gmail 	Sends the personalized reflection or support response

challenges

- **Google Sheets Integration** – Connecting n8n with Google Sheets.
- **AI Response Formatting** – Getting consistent and structured AI responses.
- **Pattern Recognition** – Identifying meaningful patterns from recent entries.
- **Stress Detection** – Creating reliable high-stress alerts.
- **Workflow Integration** – Connecting all nodes and ensuring smooth automation.

ethical reflection

-  **Privacy** – Protecting users' personal journal and wellbeing data.
-  **Responsible AI** – Ensuring AI reflections are supportive and not misleading.
-  **User Safety** – Providing appropriate support when serious distress is detected.
-  **Bias & Accuracy** – Avoiding incorrect patterns or assumptions about users.
-  **Human Oversight** – AI should support reflection, not replace professional help.

**thank
you!**
